A memo game both showcasing dinosaurs and playfully training memory skills.

Which dinosaur only has two fingers? And what is the name of the one that lived in the ocean? This modern colourful matching game with extra-large cards offers both gaming fun and a basis to discover eight of the most well-known species and learn their names – perfect for all small dino fans!

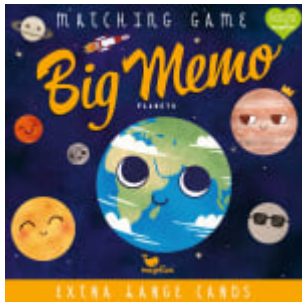

Creative People:

Illustrator: Louise Forshaw was born in 1987 – probably with a pencil in hand! Her passion for drawing started when she was about 4 years old. She graduated Newcastle College with a Bachelor of Arts degree in illustration and animation in 2008. Louise lives in a small town northeast of Newcastle upon Tyne, works from home in a small studio (sometimes even from the sofa), and is duly watched by her three loud and naughty Jack Russell terriers.
