MyRoads® – the new must-have toy world for road gaming fans made of recycled wood – sustainable and made in Germany!

The "MyRoads" starter set is the beginning of a new environmentally friendly toy world for children. The 44-piece set includes stretches of roads, curves, straights and junctions of different sizes as well as a garage with a timeless retro design. Children can let her imagination run wild with this open play world: the chair becomes a tunnel and curves wriggle around table legs. It is the perfect gift for any car lover!

Furthermore, these made to last toy road pieces are easy to connect and can be combined with other toys as well as other expansion and additional sets from "MyRoads" for limitless playing fun. The "MyRoads" sets are sustainable products made of wood-based material and an alternative to plastic. Natural products can show signs of wear and tear after usage and color deviations in the print image. The starter set is designed for an up to 7 meters (23 feet) long street. We suggest the "MyRoads" Racing Track to anyone who is looking for a round circuit street. Toy cars are not included.
