17 July 2018

Further information [here](#)

This unconventional protagonist tells her story with black humour and a surprising twist.

Apparently, the universe has it in for Lizzy. She's the most unpopular girl in her class – and suddenly stuck with a bunch of misfits and her own project for the school festival. The whole thing seems doomed to fail: No one believes in them, not even the team members themselves, and obstacles are constantly thrown their way. Lizzy, however, is not one to give up. Together they could finally make a change! She's also a bit short of domestic bliss: her parents are at each other's throats, her brother is acting even weirder than usual, and her best friend suffers from disastrous lapses of taste. If mediating that weren't enough, there's this new guy in school who throws Lizzy's heart into turmoil. Cue her friends, who have decided to make Lizzy the new students' rep – which is the last thing in the world she wants! Or so she thought until she finds out that this might just be the golden opportunity to get back at a certain teacher who has become Lizzy's personal foe ...

Creative People:

Author: Mario Fesler, born in 1978, loves variety. After growing up in a small village in the Odenwald, he now lives in Berlin. He is not only a writer, but also a literary scientist, a team leader in customer service, and a quiz host. Therefore, it comes as no surprise that variety is a fundamental aspect in his books as well: After his award-winning series about the quick-witted teenage girl Lizzy Carbon, Fesler proves in his new thrilling agent series that cute little rodents can be “extremely dangerous”.
