**An opulent, gorgeously illustrated extensive work of non-fiction covering (almost) everything there is to know about our oceans and seas.**

Two-thirds of our planet is covered by water and just as vast as those waters is the knowledge about our oceans and seas imparted within the pages of this book. Take a deep dive with numerous maps of all kinds and sizes: Get to know our oceans and seas, their formation and history. Learn how they “work” and what their importance is for humanity and the animal kingdom. Study cartography, join explorers on their journeys, sail with Vikings and pirates, and read about mythical sea creatures. And when you’re done with the past and present, take a peek into the future and find out what might lie ahead for them there ...

## Creative People:

**Author & Illustrator:** Maren Hasenjäger, born in 1988, studied illustration in Münster where she still lives with her husband and their two cats. She has been working as a freelance illustrator and graphic designer and enjoys drawing children, space, and animals with party hats.
