**A Factual yet poetic world tour with a special visual concept and spectacular illustrations.**

On our planet, nature is always in motion, affecting the habitats and animals that live there. Some are caught between frost and thaw, some shaped by the flow of water, and others rise out of the ashes of fires. Change requires flora and fauna to adapt, but change itself is also transformed by humankind.

Come along on a fascinating journey around the globe – discover 13 extraordinary places from Iceland to Australia, from Chile to Japan, and beyond ...

## Creative People:

**Author:** Johanna Prinz has a PhD in biology. She was a monkey researcher at a zoo, the head of the educational department of a large museum of natural history and later on a national park house at the Wadden Sea. Today, she works from her home of choice, Lübeck, in the area of nature communication and is a consultant for museums and an author of children's non-fiction books. Sometimes, she picks up earthworms from the street.

**Illustrator:** Jana Walczyk, born in 1989, studied design and illustration at the University of Applied Sciences Münster, the Accademia di Belle Arti Bologna and the HAW Hamburg, where she graduated with an MA in 2017. Since then, she illustrated numerous children's and non-fiction books.
