A comprehensive and naturalistically illustrated non-fiction book about insects with the newest scientific information.

Have you heard of antlions, bombardier beetles, and zombie cockroaches? They are insects that actually exist, and as exceptional as their names are their talents. Take a deep dive into the biggest species class on our planet and learn how these creepy-crawly animals survive, communicate, fly, transform, trick their enemies, and much more!

Creative People:

Author: Tim-Henning Humberg studied molecular cell biology at the Philipps University in Marburg. He then did his doctorate at the Université de Fribourg in Switzerland, where he still lives today with his wife and his three children.

Illustrator: Johann Brandstetter was born in 1959 in Upper Bavaria. He started out working as a restorer and later switched to artistic illustration. He has illustrated almost 200 books and his work has received numerous awards.
